

Unmatched customer service ties it all together.

Even the best products fall short if they are not backed by outstanding customer service. That's one of the most important things that has not changed since 1942. We listen - and do what we say we will do.

As a leading contract manufacturer of CNC machined components, we have built our reputation not only with the highest-quality products, but also on three words that define our past - and our future:

Pride • Integrity • Passion

We have a long company history - a history that not many companies like ours can look back on. It's a history built on a solid foundation of pride. We knew from the beginning that we wanted to be the best. And that meant taking pride in our work - every day.

Certifications

We pride ourselves on staying on top of our industry's exacting standards. We meet current international standards for quality and traceability, and our facility is currently

- ISO 9001 Certified
- AS9100 Certified
- ISO 13485 Compliant
- FDA Compliant Facility, Operating in QSR/cGMP Compliance (QSR 21 CFR Part 820 Compliant)

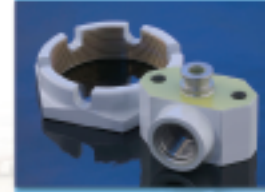

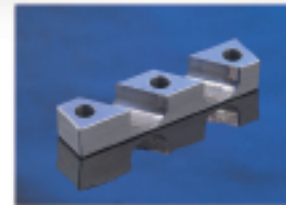

Yesterday. Today. Tomorrow. Our commitment to you comes first.

Contact us today and let us show you how you can benefit from our world-class quality.

Visit www.ppp-inc.com to learn much more, and to view our itemized facilities list.

We're proud to say that when you call us, you will never get a recording. You'll hear a live, friendly voice that will direct you to the person who can help you.

A Part of Your Future Since 1942

In 1942, Precision Piece Parts opened its shop with a mission to provide the industry's highest-quality precision machined parts. More than 60 years later, those same standards of quality are still in place.

And while the shape of the "pieces" has changed, the attention to detail, compliance standards, and pride in providing outstanding customer service have not.

We're proud of our past, and we're excited about our future. Let us prove to you that we have the capacity, equipment and standards you are looking for.

World-class products for world-class applications

Commercial

We would be hard-pressed to name an industry that we haven't serviced. Whether we've provided one piece – or 50,000 pieces – countless companies have relied on us to keep them supplied with high-quality precision machined parts.

Our finely turned, milled, ground, or rolled pieces are used in an ever-growing variety of industries. Much of our output, however, is concentrated in the following areas.

Biomedical/Orthopedic

This established segment of our business calls for the highest standards of precision and control, with extremely close tolerances and finishes. Our extensive experience in this field allows us to produce the results that are required by exacting clients. Our customers also know that they can count on us to maintain high standards of confidentiality in this highly proprietary field.

Aircraft/Aerospace

Part size and volume are easily handled by our sophisticated equipment as we service the increasing demands of this specialized industry. From machining high-temperature alloys to producing rolled threads, our extensive experience is unmatched as we produce parts that are represented in the skies throughout the world.

Aerospace

Commercial and Industrial

Numerous companies rely on us to keep them supplied with replacement parts, electrical components and machinery parts. In our more than 60 years in business, we have worked with numerous companies in diverse industries. They all know that they can rely on Precision Piece Parts, Inc. to deliver exactly what they need – with attention to detail, world-class quality, and outstanding customer service.
